

Note Flow

NoteFlow is a task management application built using Flutter and Dart.

Mahek Taneja

Purpose

To help users organize tasks, view schedules, collaborate seamlessly, and manage productivity from a single app.

Key Features

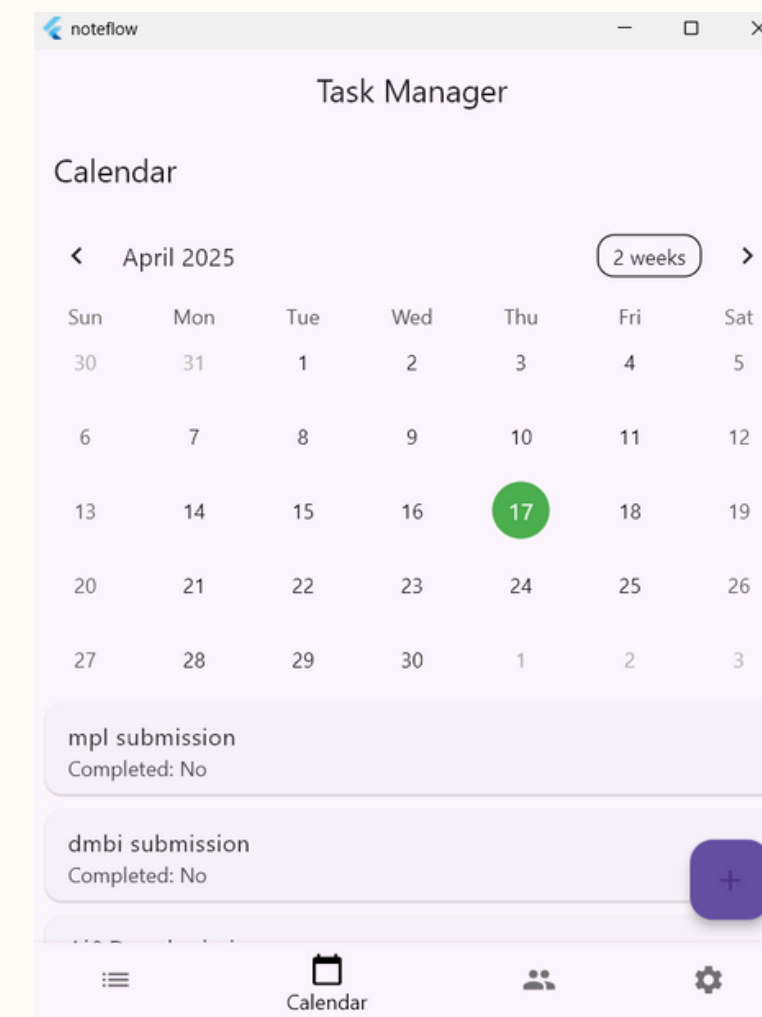

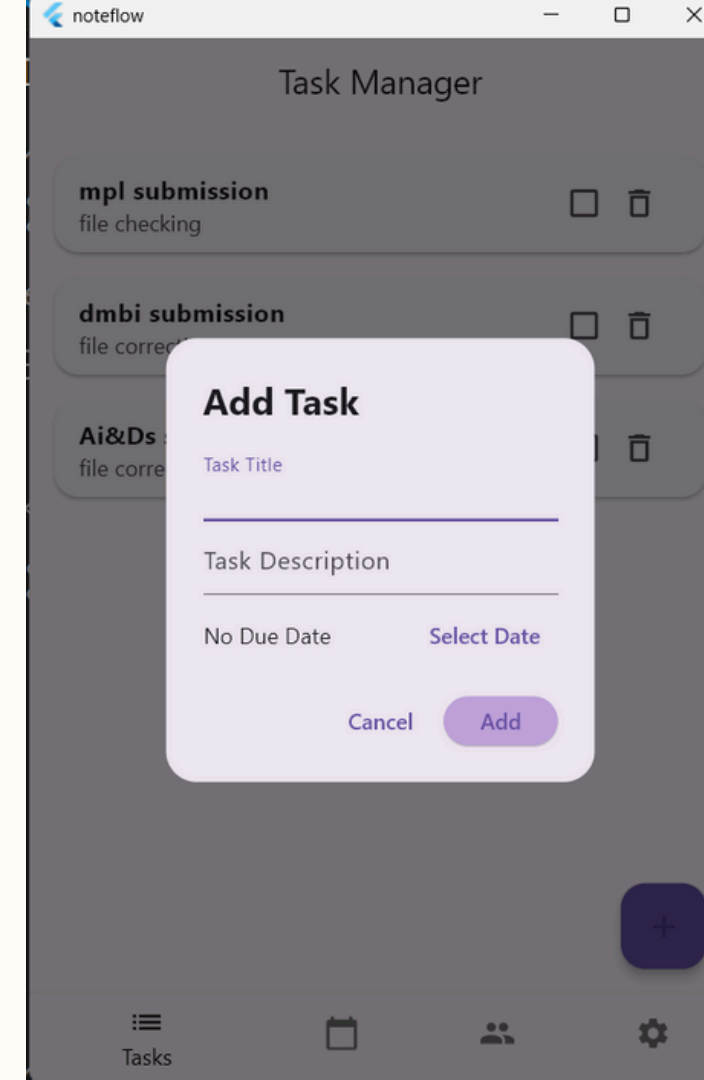

- Task Management
- Calendar View
- QR-based Collaboration
- File Import & Export
- Settings & Preferences

Task Management:

- Create, update, and delete tasks
- Organize by categories or deadlines
- Mark as complete/pending
- Persistent storage support

Calendar View

- Built using table_calendar
- Visual representation of tasks per day
- Tappable dates for detailed task view
- Syncs with task list in real-time

Collaboration via QR Code

- **How it works:**

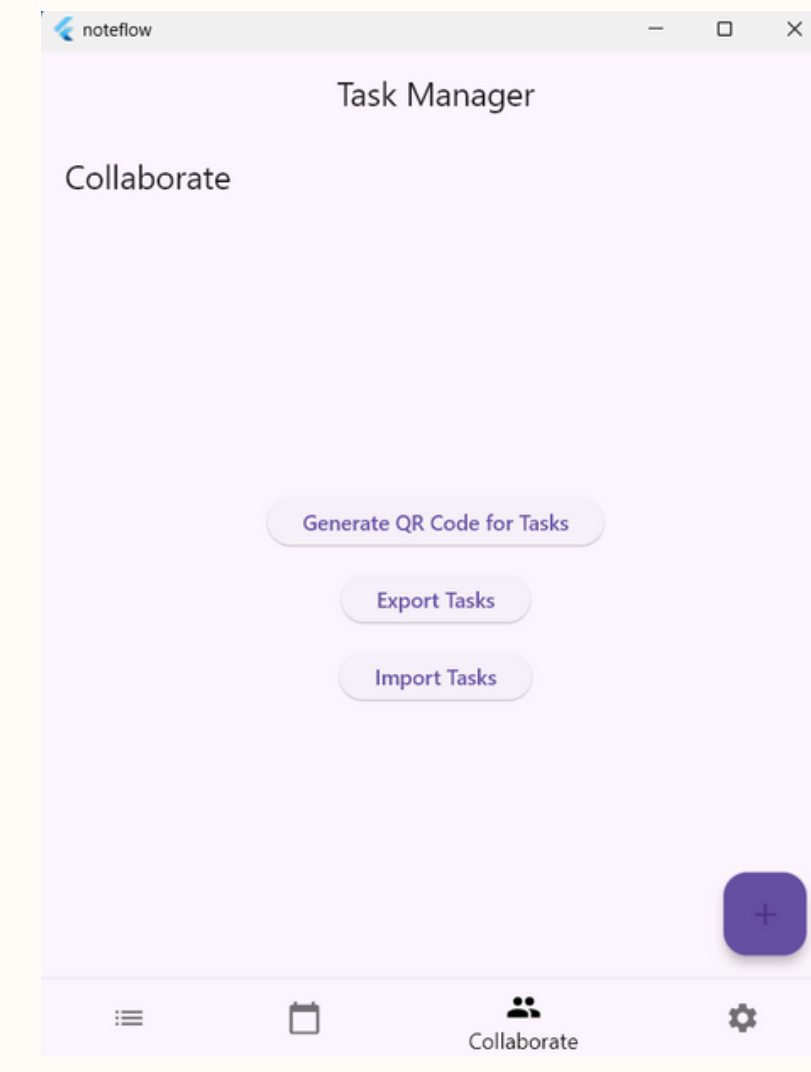

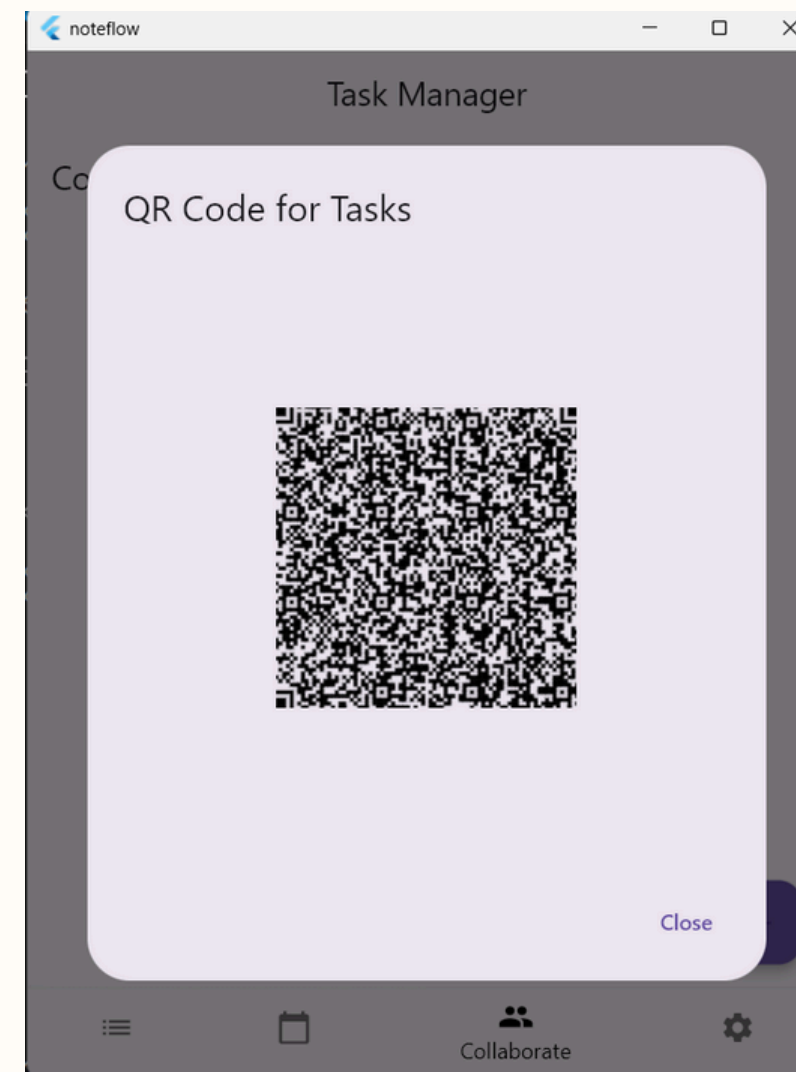

One user generates a QR code containing task data
Other users scan using in-app scanner to sync tasks

- **Use case:**

Group projects, team coordination, shared schedules

Import & Export Feature

- Import: Load task files (.json/.txt) from device storage
- Export: Save current task list to external file
- Useful for backups, sharing, or migration
